

SwitchBox provides a quick transfer solution to achieve rapid and safe connection respectively to grid-tied and EV charging wires as well as enhancing circuit break protection at the EV charging end to make charging faster. The box can also be plugged and unplugged with the charging gun by a tailor-made aviation connector to increase the current bearing ability and achieve rapid and safe charging.

Model	SwitchBox-16AS	SwitchBox-32AS	SwitchBox-16ATS	SwitchBox-32AT
Phase	230Vac (L+N+PE)		230Vac (3L+N+PE)	
AC Input (Grid)				
Input Voltage	230V			
Input Current	64A			
AC Oputut (Inverter)				
Output Voltage	230V			
Output Current	32A			
AC Output (U Charger)				
Output Voltage	230V			
Output Current	16A	32A	16A	32A
